

Wake Up

Say this was more than old lovers
Slipping up and falling fast
It was more than just last night
Wait before we make all the same mistakes
And miss our chance to prove
We were wrong, we were right

CHORUS

When I wake up
When I wake up
Will I turn to find you laying by my side
When you wake up
Will we make love
Or will you be gone before the morning light
A dream, like a dream, you and me again
Caught up in this thing that we thought
We had lost
Arms wrapped around everything is tangled up inside my mind
Everything we forgot

CHORUS

I can feel you now
I can feel you now
Can't we just stay the night
And leave all our trouble behind

CHORUS
